

City of Edina Licensed Fire Extinguisher Servicing Companies

Fire extinguishers should have a visual inspection monthly that can be performed by any staff member. This inspection should be recorded. A visual inspection is defined as a quick check to ensure that each extinguisher is in its designated place, that it has not been actuated or tampered with, pressure gauges are in proper range, there are no obstructions to access or visibility and that there is no obvious physical damage or condition that would interfere with its use or operation.

Fire extinguishers must have annual maintenance performed by a licensed fire extinguisher professional. Maintenance is a more thorough examination of mechanical parts, extinguishing agent and expelling means of each portable extinguisher in the facility. For a list of professionals licensed in Edina, see below:
