

Did you know?

Smoke alarms should be tested monthly.

Smoke alarm batteries should be changed at least once a year.

All smoke alarms should be replaced every 10 years.

Working smoke alarms cut in half your risk of dying in a residential fire.

WHAT YOU NEED TO KNOW ABOUT:

SMOKE ALARMS

- **Install smoke alarms in every bedroom, outside each sleeping area and on every level of the home, including the basement.**
- **Interconnect your home's smoke alarms. This way, when one sounds, they all sound. (you can purchase wifi alarms for homes without hardwired alarms)**
- **Teach children the sound of the smoke alarm and to exit the home/building when it sounds.**
- **Place alarms on the ceiling. If alarms are placed on the wall they must be no more than 12 inches below the ceiling.**
- **People who are hard of hearing can use strobe alarms or bed shakers**
