

Did you know?

Last year in Minnesota the leading cause of structure fires was cooking.

Cooking fires caused nearly \$6 million in damage last year in Minnesota.

The top two factors last year in cooking fires were unattended equipment and combustibles too close to a heat source.

PREVENT COOKING FIRES

- Stay in the kitchen when cooking.
- If you leave the room, turn off the stove and move the pan from the burner.
- Set a timer on your phone or that that you can take with you
- Keep things that can burn — oven mitts, towels, and wooden spoons — three feet from the stove.
- If a fire starts, slide a tight-fitting lid on the pan and turn off the heat.
- Avoid loose-fitting clothing that can easily catch fire.
